■Heat design

The following pictures show some measurements of mounted 5W Led on the heat sink for each board A and B (See Fig 1) with using thermograph to make an observation about heat distribution. Each boards is tested at various current conditions.

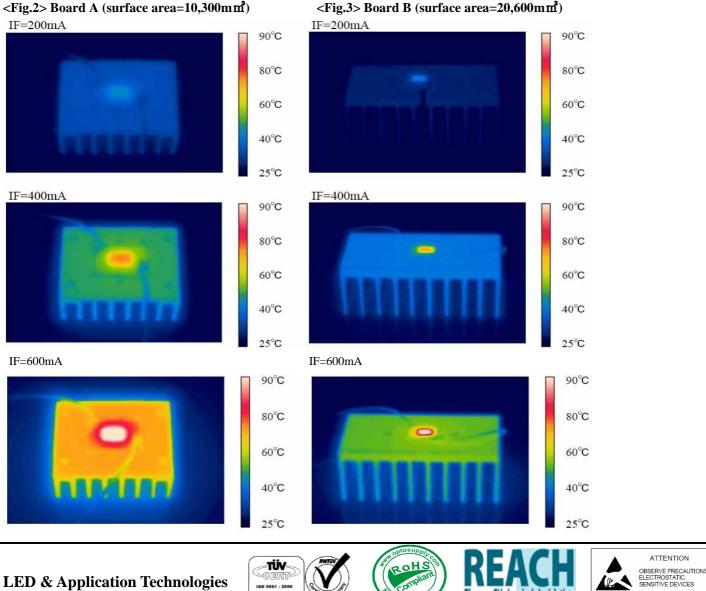

As a result, LED needs larger heat sink as much as possible to reduce its own case temperature.

Board	LED power	Material	Surface area (mm²) Min.
А	5W	Al	20,600
В	10W	Al	41,200
С	25W	Al	103,000
D	50W	Al	206,000
Е	100W	Al	412,000
F	200W	Al	824,000
G	300W	Al	1236,000

Above tested LED device is attached with adhesive sheet to the heatsink.

For reference's sake, Tj absolute maximum rating is defined at 115°C as a prerequisite on design process of 5W LED.
